MOHAMMAD ALI PRIMARY EXAMINER							

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments filed 2/20/2007 have been fully considered but they are not persuasive.

Regarding claim 1, Applicant mainly argued that Chaudhuri neither describes or suggests selecting first and second items from an inverted index since none of the hash values has a "listing of articles" associated with them, resulting in the compression to be performed before any selection of first and second items. Examiner disagrees with Applicant's allegation that none of the hash values has a "listing of articles" associated with them, the evidence provided in support of the conclusion that the compression is performed before selection in Chaudhuri. It is not true that each hash value is only associated with a single Colld. For example, the hash value v2 is associated with c1 and c2, and the hash value v3 is associated with c1 and c2. Each of the hash values, which can be interpreted as the "items", is associated with multiple Colld's as evident in Figure 4. Since v2 and v3 have the same "listing of articles" associated with each of them, these listings are compressed and represented as x, resulting in the combined total size smaller than the size of the uncompressed table. Applicant also argued that the hash values are identical to one another. Examiner traverses this argument because the hash values represent different keywords; therefore, they cannot be identical to each other. The entries (or the "listing of articles") associated with the hash values can be identical as discussed above, but the hash values themselves are not identical to each other. Explanation provided above applies to Applicant's arguments regarding claims 16, 18 and 28, as they deal with the same points already

discussed.

Explanation provided above also applies to Applicant's arguments regarding claim 11 as the Applicant stated that Pugh and Spencer do not cure the deficiencies of Chaudhuri. Since Chaudhuri, based on the explanation given by the Examiner, can remedy these deficiencies, Pugh and Spencer do not need to cure these deficiencies.
